Pathways Implementation Update – Texas Sites

Current Implementation Status

- 3 active clinics in implementation phase
- Additional clinics in scheduling phase
- Texas clinic will be the first practice nationally to launch the finalized Pathways implementation plan
 - Highly engaged practice and aligned with MMH integration goals

Early Implementation Themes

- Practices value clear post-screening workflows and defined next steps
- PeriPAN integration is increasing clinic engagement and consultation utilization
- Tailored implementation support has helped sustain clinic participation
- Collaboration between implementation teams and practices has strengthened regional partnerships

“This process helped us build a workflow that fits our practice and finally gives us clear next steps after screening, with PeriPAN integrated into the process.”

PeriPAN Team Reflections

“The collaboration fostered stronger working relationships with clinics in our catchment area and increased engagement with PeriPAN services.”

“The process highlighted the importance of developing workflows collaboratively with practices and reinforced that there are no shortcuts to sustainable implementation.”

“The Pathways team has been responsive and solution-oriented, quickly adapting when clinical feedback identified areas needing refinement.”

“Participating in implementation has increased understanding of the operational realities OB clinics face and how to best support them within existing resource limitations.”

“The experience provided valuable insight into how other regions structure maternal mental health workflows and utilize available resources.”
